

Minor Issues on References of 10.3390/cli13040074

An investigation reveals that several reference records in the article [1] are incorrect.

Ref	Title given in the article	Correct Title	DOI
6	Trends and zonal variability of extreme precipitation events over East Africa during 1960–2017	Trends and zonal variability of extreme rainfall events over East Africa during 1960–2017	10.1007/s11069-021-04824-4
25	Analysis and evaluation of extreme precipitation trends and geological hazards risk in the lower Jinshajiang river	Analysis and Evaluation of Extreme Rainfall Trends and Geological Hazards Risk in the Lower Jinshajiang River	10.3390/app13064021
56	Rapid urbanization and more extreme precipitation events	Rapid urbanization and more extreme rainfall events	10.1016/j.scib.2020.02.002

For example, the title of the Ref 6 [2] is given as "Trends and zonal variability of extreme **precipitation** events over East Africa during 1960–2017"; while the correct title should be "Trends and zonal variability of extreme **rainfall** events over East Africa during 1960–2017". Similar mistakes are found for the Ref 25 and Ref 56. In both cases, the "rainfall" in the correct titles is replaced by "precipitation" in the article [1].

It remains unclear why these mistakes occur.
